RAHEEMULLAH

Aspiring Software Engineer (Web Developer)
Age: 18 | Location: Lahore, Pakistan

Phone: [+92-XXX-XXXXXXX]
Email: [your.email@example.com]
GitHub: [github.com/yourusername]
Portfolio: [your-portfolio-link.com]

Professional Summary

Motivated 18-year-old Software Engineering undergrad at UET Lahore with a strong focus on modern web development. Skilled in building responsive, user-friendly full-stack applications using React, Next.js, and Node.js. Passionate about clean code, performance optimization, and learning new technologies to solve real-world problems.

Education

University of Engineering & Technology (UET), Lahore
Bachelor of Science – [Software Engineering / Computer Science]
Status: Undergraduate (In Progress)
[September 2025] – Present

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Technologies, Databases, Software Engineering Principles.

Technical Skills

Frontend:
HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS / Bootstrap, Responsive & Mobile-First Design

Backend:
Node.js, Express.js, RESTful API Development, Authentication & Authorization (JWT, sessions)

Databases:
MongoDB, MySQL / PostgreSQL (basic familiarity)

Tools & Platforms:
Git, GitHub, VS Code, npm / yarn, Postman

Other:
TypeScript (beginner–intermediate), Basic understanding of Agile / Scrum concepts

Projects

Full-Stack Task Management Web App
Technologies: Next.js, Node.js, Express, MongoDB, Tailwind CSS

- Built a full-stack task manager where users can create, update, and track tasks with authentication.
- Implemented REST APIs in Node.js/Express and integrated them with a Next.js frontend.
- Used MongoDB for data storage and designed a clean, responsive UI with Tailwind CSS.

Personal Portfolio Website
Technologies: React, CSS3

- Developed a modern single-page portfolio to showcase projects, skills, and contact information.
- Implemented smooth scrolling, responsive design, and reusable React components.
- Deployed online using [Vercel / Netlify] for easy access and sharing.

E-Commerce Frontend (Demo)
Technologies: React, Context API / Redux, Fake Store API

- Created a responsive e-commerce interface with product listing, filtering, and cart functionality.
- Integrated a public API to fetch and display product data.
- Focused on clean UI/UX and component-based architecture for better maintainability.

Experience (Optional / If Applicable)
Freelance Web Developer
Self-Employed | [Month Year] – Present

- Developed small websites and landing pages for local clients using React and plain HTML/CSS.
- Collaborated with clients to understand requirements and deliver solutions on time.
- Maintained code in GitHub and deployed projects using hosting platforms.

Achievements & Activities

- Regular practice on coding platforms (e.g., LeetCode, HackerRank) to improve problem-solving.
- Contributed to small open-source repositories on GitHub (fixing bugs, improving documentation).
- Participated in university coding assignments and group projects focused on web applications.

Strengths

- Fast learner with strong interest in modern web technologies.
- Good understanding of fundamentals (OOP, DSA, basic algorithms).
- Strong attention to detail and code readability.
- Able to work both independently and in a team environment.
